

Documentation of the provincial workshop

**"Action Plan Development Workshop for Climate Change Adaptation in
Thua Thien Hue Province"**

At the Festival Services Center

11 Le Loi, Hue city, Vietnam

April 9th, 2010

Organized by:

**The Centre for Social Research and Development (CSR/D) – Hue – Vietnam
Department of Natural Resources and Environment, Thua Thien Hue**

Context of the workshop:

Within the framework of the ADAPTS project “Adaptive water management at the local scale” and the Vietnamese National Targeted Program on Climate Change and Adaptation (NTP), the *Centre for Social Research and Development (CSR)* in partnership with *Thua Thien Hue Department of Natural Resources and Environment (DONRE)* organized an ‘Action Plan Development Workshop for Climate Change Adaptation’ in Thua Thien Hue province. Under the NTP, each province in Vietnam needs to adopt such an Action Plan on Climate Change and to develop a number of pilot projects.

The objectives of this workshop were:

- To present the first draft Action Plan on Climate Change for Thua Thien Hue province to provincial stakeholder. The draft Action Plan is based on promising adaptive measures (both current autonomous initiatives and potential adaptation ideas) that have been identified by different stakeholders in the province.
- To get input from participants to complement and verify the relevance and coherence of the adaptation measures and to prioritize the activities.
- To stimulate the involvement and support from local stakeholders for the implementation of the action plan.

The workshop was attended by wide range of governmental officials from provincial ministries, scientific institutions as well as representatives from local NGO’s. Please refer to Annex I for a list of participants.

Content of the workshop:

The draft Action Plan on Climate Change for Thua Thien Hue province, which was presented to the participants, was prepared by CSR and DONRE on the basis of the following documents:

- National Target Programme on Climate Change Adaptation
- The ADAPTS report on “Community-based Adaptation Strategies for Enhancing Resilience to Climate Change in the Huong River Basin” (available on www.adaptation.nl)
- The Action Plan of the Department for Agriculture and Rural Development (DARD) on Natural disaster preparedness and mitigation
- The Climate Change Action Plan of DONRE

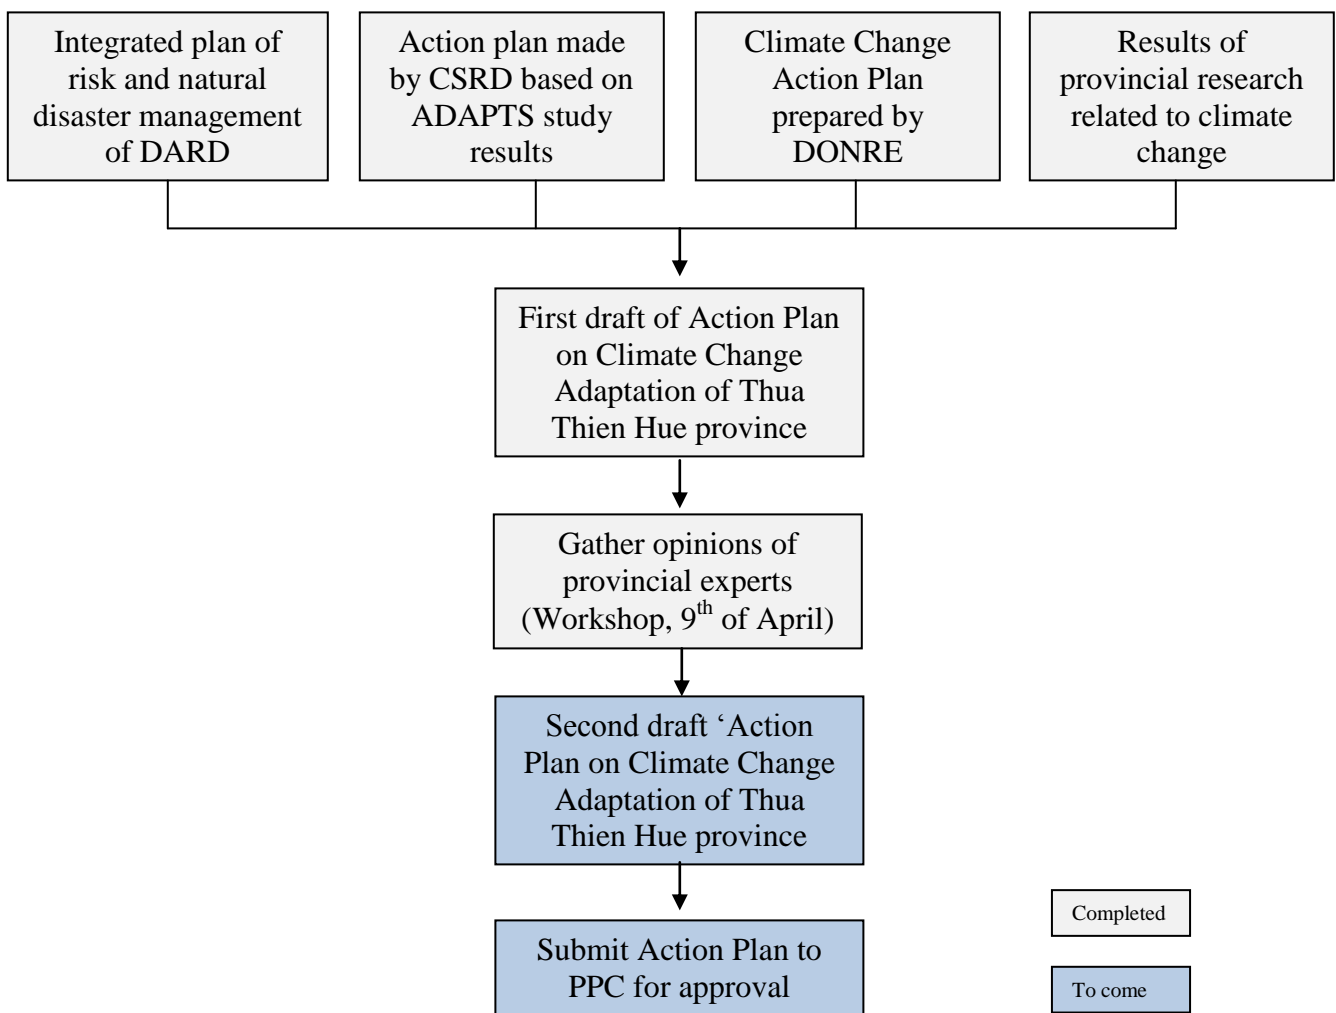

After a welcome by the head of DONRE, the content of the above mentioned documents were shared with the workshop participants. Following this, the Draft Action Plan on Climate Change was presented to the participants.

The participants then split up into five groups to provide feedback on different parts of the Action Plan. These group discussions aimed at collecting feedback on the proposed content, prioritizing the proposed measures as well as to add additional ideas. The results of each group were presented to the plenary.

Further Procedure:

DONRE in cooperation with CSRD will finalize the Action Plan taking the feedback of the workshop participants into account. The Action Plan on Climate Change will then be submitted to the Provincial’s People Committee (PPC) for formal acceptance. It is expected that the People’s Committee will need up to three month to decide on the submitted Action Plan. The implementation of the Action Plan on Climate Change shall start in 2011.
